

Sprint #4 Report: rent.sc

Members: Luke Chang, Josue Leyva, My Pham, Stanley Tran, Michael Wang: Project Owner

8 December 2020

Actions to stop doing:

1. Submitting the Team Status Reports past the deadline.
2. Clean up finalized code before merging into the main branch

Actions to start doing:

1. Pulling the most updated version of the code before working on a task.

Actions to keep doing:

A lot of what we have done has been working well:

1. Continue creating and checking pull requests to avoid merge conflicts.
2. Continue having Scrum meetings that last 15 minutes so that we understand how much progress has been made instead of problem-solving issues.
3. The team should allocate separate time for problem-solving tasks since some of this would mesh into our Scrum meeting.
4. Express the amount of work done, provide data to update the charts.

Work completed/not completed:

Completed:

1. As a user, I need to be able to create and schedule appointments on the main listings page.
2. As a user, I need to be logged in when trying to contact the landlord, schedule an appointment, or create a listing.
3. As a user, I want to be able to message other Homeowners and tenants to ask questions about listings.
4. As a landlord, I want to be redirected to the main listing page or the user profile page after creating the listing.
5. As a user, I want a user profile page to view listings and reviews more easily.
6. As a developer, I need to edit the Main Listings page and the window markers to accommodate for custom pictures.
7. As a user, I want to be able to view the travel time to the nearest bus stop
8. As a developer, I want to clean up the navigation bar and make sure all links work.
9. As a developer, I want to get rid of all warnings, errors, unnecessary code/comments
10. As a developer, I need to create unit tests for the appointments component of the app.

Not Completed:

1. None

Work completion rate:

We completed 10/10 of our user stories during Sprint 4. Our total number of estimated ideal working hours is 65 elapsed over 14 days.

From this sprint, we estimated a total of 65 ideal work hours over 14 days. We were able to complete 10 user stories during the sprint period.
