Working Prototype Known Problems Report

rent.sc

housing, made easy

10 December 2020

1. The messaging system has some parts that are not working entirely

    a. User cannot create rooms, leading to a potential problems

        i. If a user does not have a pre existing room, then there will be an error

        ii. For every UsertoRoom mapping there can only be two mappings to a room or else there may be errors thrown

2. Removing appointments until the document in Firestore is empty messes up the indexing of additional appointments. The remove button would not work as expected with NaN indices.

3. Logout button in navbar does not fully work

4. Navbar has links that don't work

5. Resizing window messes with the formatting of some HTML elements.

6. Different sized images will change sizes in the carousel on the main listings page.

7. Trying to use the back button to go back to the main listings page does not work.

8. The filtering can not result in what you want entirely

9. Selecting the pin might zoom in more than necessary on different dimensions of browser

10. Some images appear blank in the carousel on the Home page.

11. Failing to login requires you to refresh the page to try again.

12.
