Sprint #2 Plan: rent.sc

housing, made easy

Members:

Luke Chang, Josue Leyva, My Pham, Stanley Tran, Michael Wang: Project Owner

Completion Date: 11 November 2020

Revision Number: 1

Revision Date: 28 October 2020

Goal:

Add UI elements to display listings on map and on the Home page. Link created listings to user profiles.

Tasks:

1. As a renter, I need to know the price and size of the house for each listing so that I can browse listings.

    a. Display pins by querying listings data in Firebase - 5

    b. Clicking on pins will show an image, listing title, and all listing metadata - 8

Total Story Points: 13

2. As a renter, I want to be able to sort listings by tags, price, etc..

    a. Create list element on left side of main Maps page to show listings - 8

        i. Might need to work with 1a for querying data

        ii. When using a filter, make sure that only listings that meet the criteria show up

    b. Create filter buttons on the list to sort by tags, price, etc. - 5

housing, made easy

Total Story Points: 13

3. As a landlord, I want to be able to add descriptions, prices, and other specifications to my

    listing.

    a. Link specific listings with user account - 5

    b. Create web page to view private listings created - 5

Total Story Points: 10

Team Roles:
